Up to 8000 Watts
27,296 BTU's

MAKES OUTDOOR LIVING EASY ... EVERY DAY OF THE YEAR!

Extend your backyard fun with Infratech's W-Series Infrared Comfort Heaters

Hotel and restaurant patio dining

Sundecks and balconies

Enjoyable evenings outside

Flush mount installations

Clubhouse and poolside patios

Comfortable heat while relaxi

ve to move inside again!

**aters turn cold indoor and
efficient solution ideal for:**

- **Outdoor smoking areas**
- **Valet parking**

The W-Series Heater incorporates a specially designed electric quartz heating element that produces safe infrared radiant energy. Radiant energy is only absorbed by solid objects and is not wasted heating the air. In addition, Infratech heaters emit no harmful ultraviolet rays.

Since there are no open flames or carbon monoxide emissions, mounting clearance requirements are minimal. W-Series fixtures can be installed at lower mounting heights, under canvas, wood awnings, eaves and in interior locations. Adjustable swivel mounts allow for ceiling or wall installation. Short standoffs allow the fixtures to seamlessly blend in with any restaurant or patio décor.

Solid state and analog controls are available for intensity adjustment including multiple zones, timers and home system integration.

Warmth at poolside

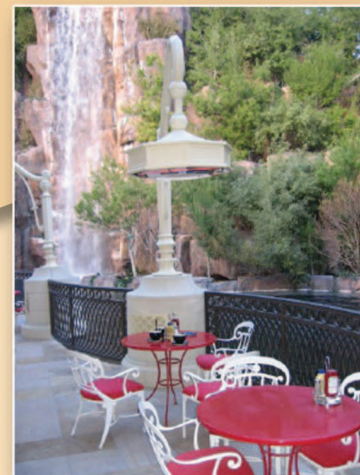

**W30
POLE MOUNT
HEATER**

- **Suitable for Indoors or Outdoors - Ceiling, Wall, or Flush Mount**
- **Mounting brackets included**
- **Low cost of ownership**
- **Minimal clearance requirements**
- **Quartz elements rated for 5,000 hours**
- **No moving parts - low maintenance**
- **Easily regulated heat output**
- **No tanks to fill**
- **One-year warranty**
- **UL Listed**

INFRATECH'S parabolic reflector is made of a special corrosive resistant alloy, an important feature for humid climates or coastal areas.

Choosing Your W-Series Heaters:

W-Series Single Element Heater

AVERAGE COVERAGE AREA				
5'	6'	7'	8'	10'
W-15 (1500 WATTS) SUGGESTED MOUNTING HEIGHTS 6' - 8'				
6'	W-20 (2000 Watts) 7' - 9'			
7'	W-25 (2500 Watts) 7' - 9'			
8'	W-30 (3000 Watts) 7' - 9'			
10'	W-40 (4000 Watts) 8' - 11'		SUGGESTED MOUNTING HEIGHTS	

WD-Series Dual Element Heaters

AVERAGE COVERAGE AREA	
10'	11'
WD-40 (4,000 WATTS) SUGGESTED MOUNTING HEIGHTS 8' - 12'	
9'	WD-50 (5000 Watts) 8' - 12'
11'	WD-60 (6000 Watts) 10' - 14' SUGGESTED MOUNTING HEIGHTS

NOTE: Indoor or well-protected environments will generally exceed average. Heaters can provide less than average coverage in extremely cold/windy conditions.

STEP #1 -

Determine the approximate measurements and mounting heights of the area you want coverage.

STEP #2 -

Choose the size heater(s) that will work both functionally and aesthetically (coverage area, length of heater, color of heater, ceiling, wall, or flush mount) for your installation.

STEP #3 -

Review installation table and choose (to fit your budget) between value control options or infinite adjustment with solid state controls. *(Professional installation is suggested)*

STEP #4 -

Turn on and enjoy the outdoors in comfort!
